Assessment Tool Matrix

AHCWRK302A Monitor Weather Conditions

Ver 7 Feb 2012

Evidence Legend

O Observation
Q Questioning
TP Third party verification

Element 1	Interpret weather and climate information	Method of Evidence Gathered
1.1	Weather and climate information and warnings are regularly monitored to determine likely conditions.	Q3,Q11,Q25,O1-10
1.2	Potential variations in weather and climate conditions are anticipated and assessed according to warnings, weather patterns and historical experience.	Q3,Q11,Q14,Q25,Q28
1.3	Possible impacts of weather and climate on crops, livestock and work tasks are identified to determine appropriate preventative action.	Q11,Q26,Q27,
1.4	Suitable preventative actions are reviewed to ensure availability of appropriate resources and responses.	Q22,Q27,Q28,

Element 2	Carry out preventative action	
2.1	Information and advice is promptly disseminated to relevant personnel.	TP,Q17,Q21
2.2	Preventative action is determined according to the known effects on livestock, crops and work tasks.	Q21,Q27,
2.3	Actions to minimise loss and damage are implemented.	Q26,Q27,
2.4	Livestock or crop management program and work schedules are adjusted and revised according to climatic changes.	Q26,

Element 3	Monitor weather and climate	
3.1	Regular updates are accessed to determine the ongoing suitability of current programs.	O1-10,Q25,Q16
3.2	Viability of livestock and crop management practices and scheduling of work tasks are reviewed to ensure suitability within meteorological conditions.	Q18,Q26,Q27,Q28,
3.3	Research on forecasting techniques is undertaken to maintain currency of information.	Q25,Q27,
3.4	Relevant information is documented and recorded according to enterprise requirements.	Q9,Q23,FWO Log Book + O1-10

Required Skills and Knowledge

This assessment covers Required Skills & Knowledge where applicable and critical aspects of evidence.
