## FPICOT6206A

### Develop and manage a Forestry Chain of Custody certification process for the workplace

The technical resources listed below can help the learner complete their assessments on the potential uses of wood residue. Click the link to view:

1. [Chain of Custody Supply Chain and Market Overview](#)

Video interview with David Gover, Gunns Timber Products, Heyfield Hardwood Mill. David discusses Chain of Custody as a product attribute, certified material supply profiles, customer profiles, market overview in Australia and internationally and marketing, branding and use of official logos.

2. [Implementing Chain of Custody In An Enterprise](#)

Video interview with Roland Freyer, Forestry Tasmania. Roland discusses key principles in quality assurance, other existing systems along with managing and supporting the implementation of Chain of Custody and forest certification across a company.

3. [Implementing and Managing Chain of Custody On A Site](#)

Video interview with Trevor Innes, Gunns Timber Products, Bell Bay Softwood Mill. Trevor discusses Chain of Custody wood sourcing and material flow, operations and systems management, non-compliances, procedures structuring and continuous improvement.

4. [CPET Do you comply with the UK Government's Timber Procurement Policy](#)

This paper covers possible uses for residual wood produced in Australia and explores options for this material e.g. Vineyards, electricity generation, log exports and alternative fuels (2004).

5. [A review of Forest Certification in Australia](#)

The good practice guide explores wood fuel options, quality of the fuel and their markets. It also discusses the supply chain and the processing equipment required to reach the market place (2010).

6. [Chain of custody in the forest products industry: A practical guide](#)

Is a brochure that explains the recycling process of industrial timber waste and the new products created, such as animal bedding and mulch (2004).

7. [Chain of custody for the timber industry system manual](#)

About 70% of plantation softwood goes into housing frames; this fact sheet explains what products are produced by each part of the tree.

8. [EWPAA Guide to AFS and PEFC Chain of custody](#)

The hardwood saw mill industry in Australia generates large volumes of wood residues in the form of chip, bark and sawdust and understandably it is keen to use this to increase revenue streams. This report explores options of producing revenues from sawmill residues (2007).

9. [FWPA Chain of custody certification guide - forest manager](#)

This report develops a business case for the value adding of small thinning and residues in Northern NSW (2008).

10. [FWPA Chain of custody certification guide - primary processors](#)

Describes the processes used by a wood energy pellet manufacturing company utilising harvest residues from sustainably managed plantation as feedstock (2011).

11. [FWPA Chain of custody certification guide - secondary processors](#)

In this report a detailed discussion of the design of an experimental rig based on a tube furnace for testing the feasibility of combustion of treated timbers across a range of furnace temperatures that support combustion (2004).

12. [FWPA Chain of custody certification guide - seller](#)

Reviews issues surrounding the recycling and end of life disposal of timber based products to ensure that they reduce waste in landfill (2005).

13. [NCSI Frequently asked questions about wood Chain of custody certification to AS 4707](#)

It provides a 'map' for transforming wood waste into a wood resource. It begins by presenting an overview of wood waste, and then explores opportunities to encompass re-use into other product types (such as mulch, animal bedding and energy generation). The practical challenges of converting waste wood resources into value-added products are also explored (2008).
