### Develop and manage a Forestry Chain of Custody certification process for the workplace

The following videos will assist learners to develop the skills and knowledge required for the operation and management of the forestry chain of custody certification. Click the link to access video.

#### [1. Introduction to the unit](#) Duration: 19.14 mins

Discusses the unit components, including:

- Concepts of certification and sustainability
- Certification basics
- Certification procedural based activity
- Limitations: How enterprises operate in different ways
- Limitations: How firm rules are difficult to establish
- Limitations: The exceptions to the guidelines
- Flexible delivery overview of the components

#### [2. Planning the task – management plan](#) Duration: 31.47 mins

Find out how to establish a Chain-of-custody management plan, including:

- Implementation plans
- Internal implications
- External implications
- Approval of plan
- Implementation and management

#### [3. Forest and chain of custody certification – key concepts](#) Duration: 27.07 mins

Learn the key concepts associated with forest and chain-of-custody certification, such as:

- Sustainability and drivers for verification of forest sustainability
- An overview of forestry and chain of custody certification systems
- The forestry certification and Chain of Custody system operating in Australia and internationally

#### [4. Forest and chain of custody certification processes in Australia](#) Duration: 33.48 mins

Learn about the certification processes applicable in Australia:

- International schemes
- Australian Forest Certification Scheme
- Forest Stewardship Council
- Bodies involved with the certification to each scheme, as well as accrediting the certifiers.

[5. Ethical and business strategies for chain of custody certification](#) Duration: 29.56 mins

Discover some of the reasons why companies decide to commit to the chain-of-custody certification:

- The ethical basis for adopting chain-of-custody in the business
- Demand for chain-of-custody from customers and other business drivers
- Marketing and promotional opportunities and restrictions with Chain of Custody to particular schemes
- The commercial benefits and financial impacts of adopting chain-of-custody

[6. Structuring chain of custody certification in your business](#) Duration: 35.42 mins

Learn the structures of the chain-of-custody certification used in practice, and the ways that these can be adapted to the business:

- Models for structuring chain-of-custody in the company and supply chain
- Assessing and co-ordinating company policy and site procedures
- Chain-of-custody and quality assurance procedures.
- Approaches to efficient procedure development.

[7. Chain of custody procedures – part 1](#) Duration: 21.28 mins

Learn the aspects of operating an enterprise, using a chain-of-custody certification scheme:

- The operational aspects of procedures
- Non-compliance reporting
- Monitored feedback processes and continuous improvement in action.

Also learn the required structures of procedures required in a Chain of Custody certification management system, including wood sourcing, legal compliance and continuous improvement.

[8. Chain of custody procedures - part 2](#) Duration: 21.50 mins

Learn more about the procedures required in a Chain of Custody certification management system on a production site, including procedures for management of records (processing, sales and despatch, promotion and labelling).
