

Trainer notes

The harvest and haulage checklists and activities have been developed to assist in building contractor's skills to:

- remain compliant with WHS regulations
- determine if contracts are viable.

The checklists include:

- Negotiating Contracts Checklist
- WHS Management Checklist.

The activities include:

- Harvest rates 1
- Harvest rates 2
- Haulage rates
- Work out your cash flow.

The activities are referred to in the Negotiating Contracts checklist and support the development of different skills to work out if a contract is viable.

The checklists and activities are not stand-alone. They should be delivered to learners in a context where there is an opportunity to scaffold skills and provide support for learning, for example about reading contracts and carrying out calculations to determine the income available from harvest and haulage work.

Before using the materials, read through the checklists and activities customise to suit the needs of the learner group.
